

PENINSULA DRAINAGE DISTRICT NO. 2
Board of Supervisors

My parents moved me to SE Portland from Orange County, California when I was 6 years old. Father started working for Bellamy Excavating in 1978 and bought out my uncle Dave Bellamy in the early 80's changing the name to NTA Contracting, Inc. I started working for my Father in the construction business doing odd jobs since I was 9 years old. I started working with him full time in 1992 Learning to run the business, creating relationships, and building the client base.

I started J. Ashe, Inc. in 1997 after helping re-establish Utility Contractors Association of Oregon & SW Washington as treasurer/secretary for the first two years of its existence. JAI has been in business for the last 12 year. JAI works on site-construction, material recycling and utility construction. We are currently doing mostly municipal work due to the economy.

I joined PEN 2 because of the concerns that I have as a resident. I was informed that there was no board member with construction experience, and hoped to help in that capacity. I have enjoyed serving on the board since Dec of 2008 thus far, and hope to continue to in the future.
