

**Byron Woltersdorf, P.E.**  
**District Engineer II**

Byron holds a Bachelor of Science degree in Civil Engineering from Washington State University. He is a licensed professional engineer in Washington and Oregon. Byron is an experienced and innovative engineer who excels at finding solutions to difficult engineering problems. As the District Engineer,

Byron provides engineering design, technical direction and guidance for proposed new development, the Districts stormwater facilities and construction projects.

Byron is excited at the opportunities and challenges the Districts' present and to be able to serve the land owners of each district.

Byron can be reached at  
503-281-5675 ext. 308
